ABSTRACT

LENS

A lens (1) is described, which has ~~comprising~~ a curved surface, a plane surface (3) and a holding edge (4) molded ~~moulded~~ onto the lens edge ~~edge~~, ~~which is pressed bright on both sides.~~ The curved surface and plane surface on both sides of the lens are pressed bright. A supporting edge (5) which projects from ~~towards~~ the plane surface (3) is molded ~~moulded~~ onto the holding edge. Such lenses are preferably used for projection headlights for motor vehicles. A method of manufacture for such lenses is also specified.
